Career Objective

Aspiring software developer with a background in civil engineering and a strong foundation in Java, web development, and database systems. Eager to leverage my technical and problem-solving skills in building scalable and efficient software solutions in a dynamic IT environment.

Technical Skills

Programming Languages: Java (Core & Advanced), JavaScript

Web Development: HTML, CSS, JSP

Frameworks & Tools: Hibernate, Spring, JavaFX

Database: MySQL

Version Control: Git, GitHub

Projects

KhanaKart – Full Stack Web App

Technologies: Java, JSP, JavaScript, CSS, MySQL

- Built a food delivery platform with an intuitive UI for browsing and ordering food.
- Integrated back-end services using Java Servlets and JSP to manage dynamic content.
- Enabled order placement and menu updates via MySQL database.

TimeTech – Frontend Web Timeline

Technologies: HTML, CSS, JavaScript

- Designed an interactive and responsive website showcasing the evolution of technology.
- Implemented a timeline UI component for chronological representation of events.

Internship

Java Intern

- Learned core Java concepts: OOPs, inheritance, polymorphism, practiced classes, objects, arrays, loops.
- Solved Java coding problems.

Education

Jawaharlal Nehru Technological University, Pulivendula

B.Tech in Civil Engineering | Minor in Data Science | CGPA: 8.28 | 2020–2024

Sri Chaitanya Junior College - Intermediate | Percentage: 95.5% | 2018–2020

Christ The King High School - SSC | CGPA: 9.8 | 2017–2018

Other Academic Projects

Concrete with Coffee Husk Ash (Final Year Project – Civil)

- Explored eco-friendly concrete alternatives by replacing cement with coffee husk ash.
- Found strength increase with curing time, like traditional concrete.

Strengths

- Strong communication and leadership
- Quick learner and adaptable
- Ethical and committed team player

Certification — Java Full Stack Web Development Course at Tap Academy.
